### **Lemon Lights Azalea**

*Rhododendron 'Lemon Lights'*

Height: 5 feet

Spread: 5 feet

Sunlight: ● ●

Hardiness Zone: 4

Group/Class: Northern Lights Series

#### **Description:**

Deciduous azalea with showy yellow flowers in spring, tall upright habit; must have well-drained, highly acidic soil, use plenty of peat moss when planting. In Middle Tennessee, this azalea performs best in morning sun with full afternoon shade

#### **Ornamental Features**

Lemon Lights Azalea is smothered in stunning clusters of lightly-scented lemon yellow trumpet-shaped flowers with a yellow blotch at the ends of the branches in mid spring before the leaves. It has green deciduous foliage. The narrow leaves turn an outstanding purple in the fall.

#### **Landscape Attributes**

Lemon Lights Azalea is an open multi-stemmed deciduous shrub with a more or less rounded form. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. It has no significant negative characteristics.

Lemon Lights Azalea is recommended for the following landscape applications;

- Accent
- Mass Planting
- General Garden Use

### **Planting & Growing**

Lemon Lights Azalea will grow to be about 5 feet tall at maturity, with a spread of 5 feet. It tends to be a little leggy, with a typical clearance of 1 foot from the ground, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 40 years or more.

This shrub does best in partial shade to shade. It requires an evenly moist well-drained soil for optimal growth, but will die in standing water. It is very fussy about its soil conditions and must have rich, acidic soils to ensure success, and is subject to chlorosis (yellowing) of the foliage in alkaline soils. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid.

### **Nursery Notes**

In Middle Tennessee, this azalea performs best in morning sun with full afternoon shade.
