Delaware Valley White Azalea

Rhododendron 'Delaware Valley White'

Height: 6 feet

Spread: 6 feet

Sunlight: ● ●

Hardiness Zone: 5

Description:

Dense clusters of snow-white blooms, some semi or double, cover this azalea in mid to late spring; needs highly acidic and organic soil that is well drained. In Middle Tennessee, this azalea performs best in morning sun with full afternoon shade

Ornamental Features

Delaware Valley White Azalea is covered in stunning clusters of lightly-scented semi-double white trumpet-shaped flowers at the ends of the branches from mid to late spring before the leaves. It has green deciduous foliage. The narrow leaves turn an outstanding yellow in the fall.

Landscape Attributes

Delaware Valley White Azalea is an open multi-stemmed deciduous shrub with an upright spreading habit of growth. Its relatively coarse texture can be used to stand it apart from other landscape plants with finer foliage.

This is a relatively low maintenance shrub, and should only be pruned after flowering to avoid removing any of the current season's flowers. It has no significant negative characteristics.

Planting & Growing

Delaware Valley White Azalea will grow to be about 6 feet tall at maturity, with a spread of 6 feet. It tends to be a little leggy, with a typical clearance of 1 foot from the ground, and is suitable for planting under power lines. It grows at a slow rate, and under ideal conditions can be expected to live for 40 years or more.

This shrub does best in partial shade to shade. It requires an evenly moist well-drained soil for optimal growth, but will die in standing water. It is very fussy about its soil conditions and must have rich, acidic soils to ensure success, and is subject to chlorosis (yellowing) of the foliage in alkaline soils. It is somewhat tolerant of urban pollution, and will benefit from being planted in a relatively sheltered location. Consider applying a thick mulch around the root zone in winter to protect it in exposed locations or colder microclimates. This particular variety is an interspecific hybrid.

Nursery Notes

In Middle Tennessee, this azalea performs best in morning sun with full afternoon shade.
